I tried completing the 3rd and 4th queries from the coding exercise using MySql Database.

(3)

Select
Case when (Select Avg(totalSpent) from receipts where rewardsReceiptStatus='Accepted') >
(Select Avg(totalSpent) from receipts where rewardsReceiptStatus='Rejected') then 'Accepted
has higher average spent'
Else 'Rejected has higher average spent'
End
From receipts

(4)

Select
Case when (Select Sum(purchasedItemCount) from receipts where
rewardsReceiptStatus='Accepted') > (Select Sum(purchasedItemCount) from receipts where
rewardsReceiptStatus='Rejected') then 'Accepted has higher count'
Else 'Rejected has higher count'
End
From receipts
